SERIES SPEED COMPARISON

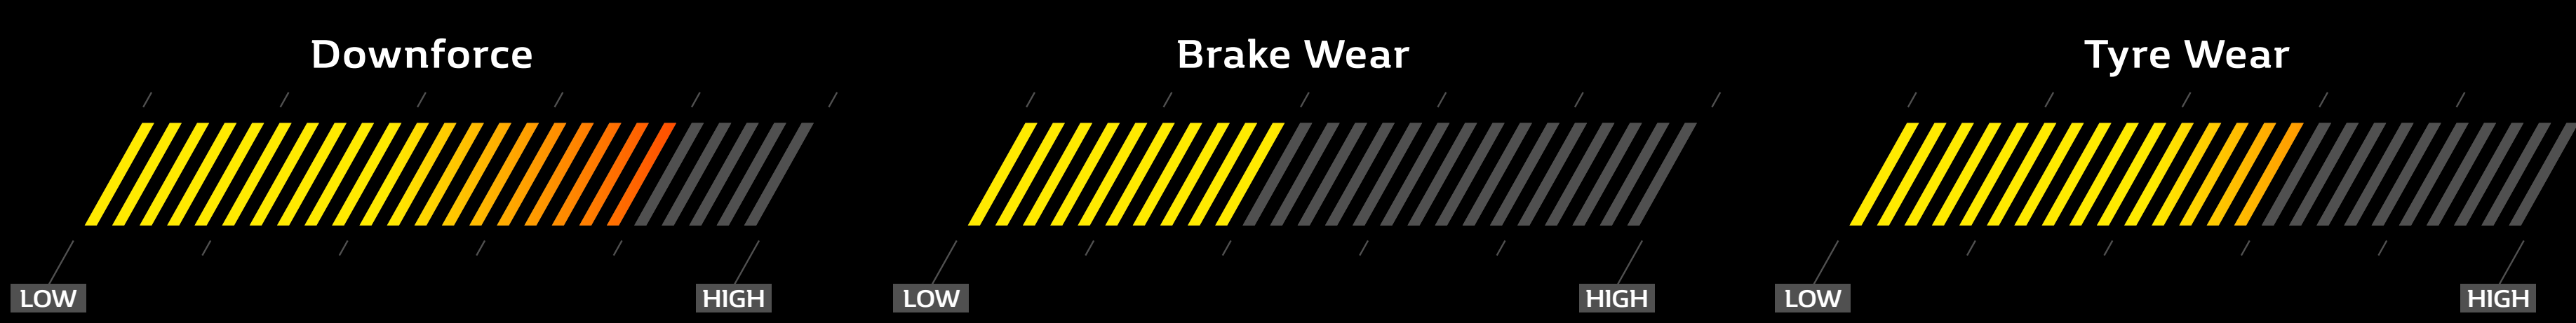

CIARON'S TRACK NOTES

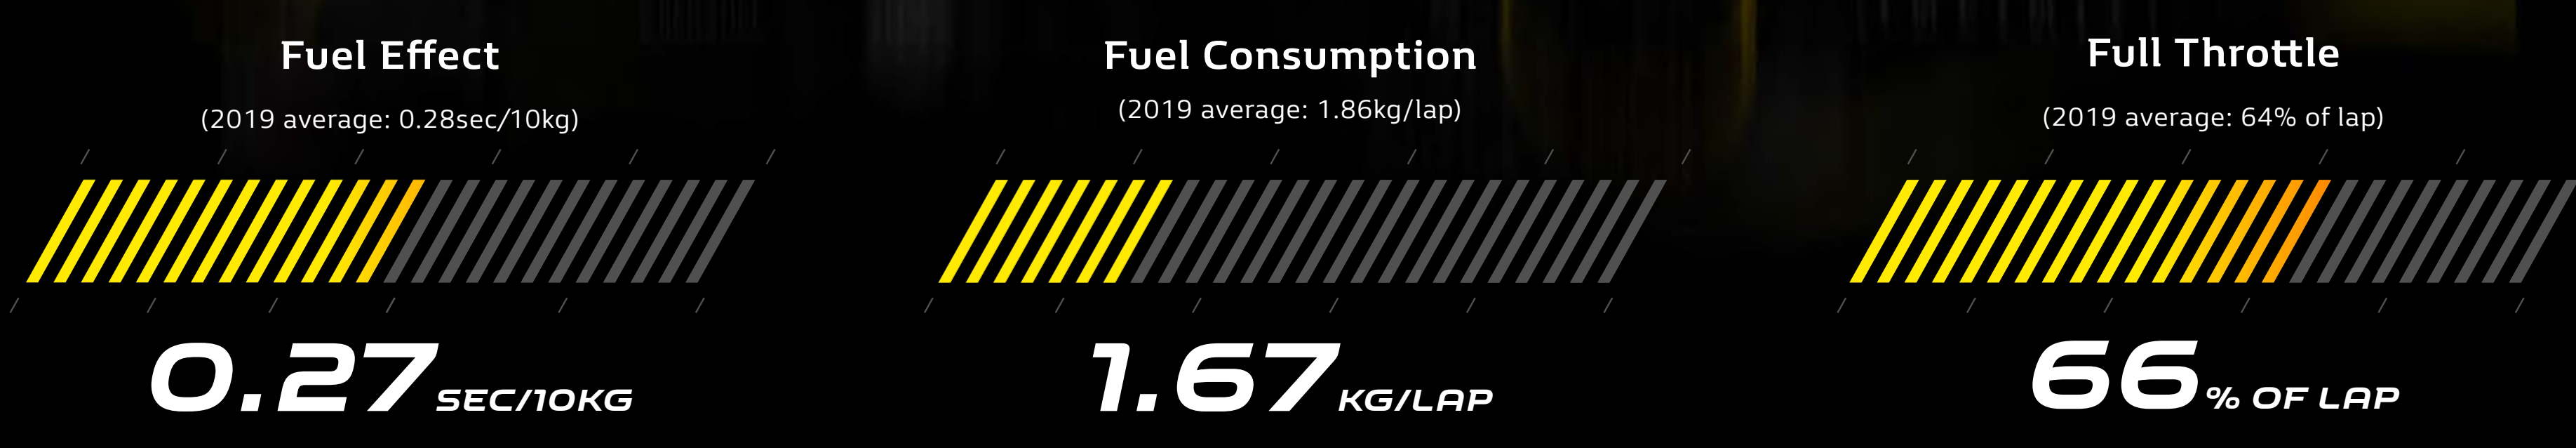

This circuit has been resurfaced since the 2017 race, and the new surface is much smoother than the old one, which has changed the character of the circuit compared to last year, both in terms of driving lines and tyre behaviour. The first two sectors have mainly medium and high-speed corners. The last sector from Turn 10 onwards consists of closely-spaced low-speed corners, which is very demanding on the rear tyres and it is easy to overheat them and lose performance through the last chicane and on to the straight.
