SERIES SPEED COMPARISON

CIARON'S TRACK NOTES

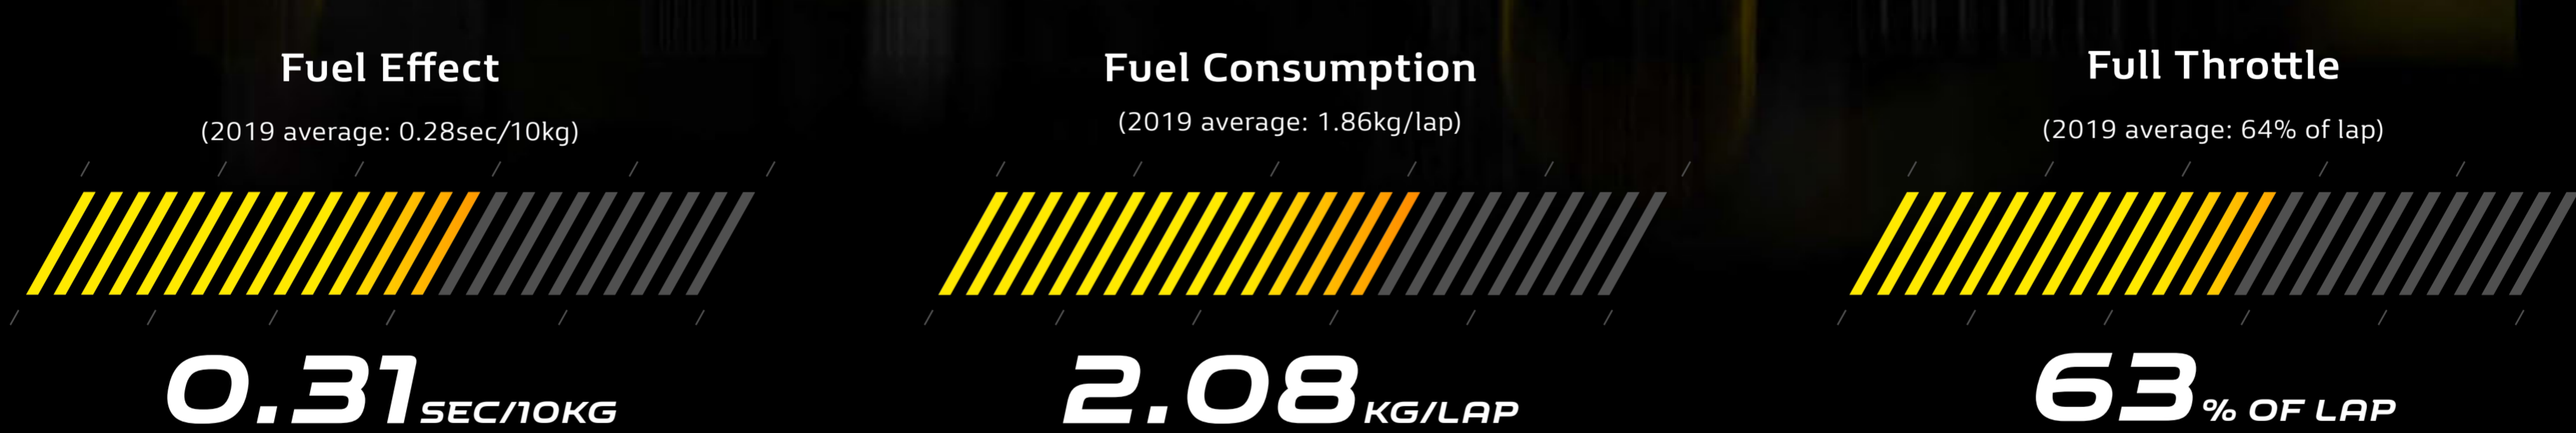

The circuit has a range of corner speeds, from the slowest at 85kph on to the start/finish straight to the flat out Turn 10 at nearly 300kph towards the end of the lap. Downforce level is not a straightforward choice here as there is a trade-off between the requirement for high downforce for the corners and a lower setting to gain more speed on the long straights. The pit entry and exit are different to last year, which will change the nature of pit stops somewhat, and the drivers will need to get used to this during the free practice sessions.
